

## **Coble Farm II Guidelines for Exterior Building Light Fixtures**

Following a discussion of the current appearance of the exterior building light fixtures throughout the complex, the BOD agreed to the following guidelines:

- Requests for replacement of exterior building lights must continue to be completed on the appropriate CFII Architectural Request Form.
- Exterior building lights must be similar to current lighting and must be carriage or sconce type.
- The size of the replacement lights must be approximating the size of the original exterior lights, i.e. twelve (12) to fourteen (14) inches.
- The replacement fixtures may be brass, bronze, or black.
