

# Seven Gates HOA Approved Storm Door Types

## APPROVED FOR THE FRONT DOOR

The doors below are the pre-approved types of storm doors for the front of the house. Any door in a similar design will be approved. The main features are:

- There is a single pane of clear glass with no crosshatches of any sort in the pane.
- The trim on the door is all black.
- The hardware on the door (handle) is brushed nickel (not brass).

Both models below have interchangeable screen inserts. Doors are available at Home Depot and Lowes as follows:

### **Available at Home Depot**

Andersen Series 3000 36-in wide Black Interchangeable Storm Door

### **Series 3000**

## **APPROVED FOR THE BACK DOOR**

The door below is the pre-approved type of storm doors for the back of the house including sunrooms and screened porches. Any door in a similar design will be approved. The main features are:

- There is no more than one crosshatch in the door as shown below.
- The door can be only screen or screen and glass.
- The trim on the door is all sandstone or another color that blends with the brick of the house and matches the current trim.
- The hardware on the door (handle) is brushed nickel or black.

Similar doors are available at Home Depot and Lowes. The doors approved for the front of the house can also be installed on the back as long as the color of the door is sandstone or something similar as described above.
