A note from the Community Resource Officer:

I would like to stress that it is ok to call for the police. If something doesn't seem right, go with your gut and call 911. Please let the officer determine if there is a problem or not. It's ok if it turns out not to be a problem, at least you're watching out for your neighbors. Anything that is happening at the moment, causing a disorder or creating a hazard needs to be called in to 911. If something happened last week or overnight and there is no evidence or suspect information, please call the non emergency number at 336-373-2222.

If further information is needed please contact our Community Resource Officer for anything that is not an emergency. She has many resources for the city as well as various home, auto and personal safety information to share. Her phone is 336-373-2658.
