Re: Trash collection by the City

The Association has been in discussions with the City of Greensboro on making some changes in the way they pick up the trash and recycling in the smaller cul-de-sacs in Coble Farm. One of the changes which will be implemented is the location that owners/residents on Framingham Lane will need to place their garbage and recycling containers for pickup by the City.

Starting on Tuesday, September 30th, residents will be asked to place their trash containers on the left side of the center island as you enter the cul-de-sac. Starting on Tuesday, October 7th, residents are asked to place their recycling container on the left side of the center island. The City truck will pull directly into Framingham in order to pick up the containers. See attached map showing the location (marked in yellow) where you should place your containers for pickup. **Only containers placed in this location will be serviced so please make sure to place them in the correct location.**

The reason for this change is that the City trucks have had problems turning their large trucks around in such small streets and have run over the curb, damaged the yards, or hit light poles (which they have repaired). The City does not have smaller trucks which can be used. This change will help to eliminate the City truck from having to pull in multiple times and causing damage to the street, curbing, or light poles in the future.

Since everyone will be placing their garbage containers in the same area, we have enclosed number decals with your house number for you to place on your containers for identification.

You can reach our office at 288-4944 if you have any questions. Thank you in advance for your cooperation as we make this change.
